ABOUT

Full-stack developer with hands-on experience in the **MERN** stack, specializing in building responsive, data-driven applications. Strong foundation in computer science from advanced high-school studies (**10** units in computer science & software engineering, plus 5-unit tracks in math, physics, and English) and the Magshimim cyber program, where I gained early exposure to programming in C#, Java, and Python. Skilled in React, TypeScript, Node.js, Express, and MongoDB, with a focus on clean architecture, automation, and creating practical, user-centric solutions.

SKILLS

Frontend	Backend	Soft Skills
- JavaScript - CSS - HTML	- Node.js - Express.js - MongoDB	- REST APIs - Attention to detail - Adaptability - Problem-solving
- React - TypeScript - TailwindCSS		

EDUCATION

Full-Stack Web Development – HackerU | 2024 – 2025 | 535 hours of hands-on coursework
Completed an intensive **1-year, 3-month** full-stack development program focused on modern web technologies. Acquired practical experience with HTML, CSS, JavaScript, TypeScript, React, Tailwind, Node.js, Express.js, and MongoDB through hands-on projects, emphasizing problem-solving, adaptability, and real-world application of development workflows.

PROJECTS

ClarityBox | HackerU’s Full-Stack Final Project
Full-Stack Web Development Student

- Developed ClarityBox, a full-stack web application created as the final project in HackerU’s Full-Stack Web Development program, combining gratitude journaling and project tracking features.
- Strengthened proficiency in the **MERN** stack and project architecture while independently exploring **GitHub Actions** for workflow automation and implementing a client-server structure connected to a **MongoDB** database.

Business Card App | Academic Practicum Project - HackerU
Full-Stack Web Development Student

- Developed a Business Card web application as part of HackerU’s Full-Stack Web Development practicum, gaining practical experience with the **MERN** stack.
- Executed both frontend and backend projects independently, demonstrating proficiency in building responsive user interfaces and implementing robust server-side functionality.

EXPERIENCE

Network Administrator & IT HelpDesk – Israel Defense Forces (IDF) 2022-2025

- Provided **network administration** and **IT support** for the brigade, serving thousands of users.
- Handled computer maintenance, software installations and updates, peripheral troubleshooting, system formatting, and user permission management for network folders and Outlook-based calendars and timetables.
- Independently developed **PowerShell scripts** within the platoon to automate administrative tasks for network administrators across the brigade, reducing processes from **hours** or **days** to **minutes** and greatly improving efficiency.
